

# SOLID STATE BOLLARDS

## BPAC12 SERIES-LED

### SPECIFICATIONS

#### CONCRETE RISER

Natural precast concrete body with light sandblast finish. A graffiti resistant sealer is applied to the surface. Internal electro-zinc plated steel cage provides additional strength for the structure and has threaded inserts welded to it for mounting the base plate and optical assembly. Base plate is 1/4" galvanized steel.

#### TOP CAP

Durable, corrosion resistant cast aluminum (A356 alloy; <0.2% copper) construction.

#### LED POWER ARRAY™

Three-dimensional array consisting of (6) or (8) individual LED Tubes fastened to a retaining plate. Each LED Tube consists of circuit board populated with a multiple of LED's and is mechanically fastened to a radial aluminum heat sink. An acrylic lens and end cap protects the LED Tube's internal components.

**CAST LOUVER (CL)** - External louver stack consisting of individual cast aluminum (A356 alloy; <0.2% copper) louver vanes which index together and are mechanically bonded to form a unified assembly. The louver stack is fastened to the concrete riser via threaded inserts. An internal clear acrylic lens is integrated with the LED Power Array module.

#### LED EMITTERS

High Output LED's are driven at 350mA for nominal 1 Watt output each. 70CRI Minimum. LED's are available in standard Neutral White (4000K), or optional Cool White (5000K) or Warm White (3000K). Consult Factory for other LED options.

#### LED DRIVER

UL and CUL recognized Constant Current LED drivers operate on input voltages from 120-277VAC, 50/60hz. Consult Factory for (347-480VAC). Driver is mechanically fastened to a retaining bracket. Driver has a minimum 4KV of internal surge protection, 10KV & 20KV Surge Protector optional. Dimmable and High-Low Driver options available.

#### FINISH

Polyester powder coat incorporates four step iron phosphate process to pretreat metal surface for maximum adhesion. Top coat is baked at 400°F for maximum hardness and exterior durability.
