# PENDANT MOUNTED ARM
XWD

FEATURES

Arm
Heavy cast aluminum (A356 alloy, <0.2% copper) swept arm welded to an extruded aluminum hub with a domed pole cap. The mounting hub is designed for a 2 7/8" x 6" tenon and has 8 (4 x 2) recessed socket head leveling screws. All welds are blended to create a one-piece, unified appearance. Fixture mounting uses the pendant Trulevel mounting to allow for luminaire leveling in the field. A wiring harness is provided through the arm assembly terminating in the Trulevel hub with quick-connects. All hardware is stainless steel.
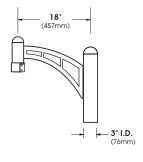

Finish
Electrostatically applied TGIC Polyester Powder Coat on substrate prepared with 20 PSI power wash at 140°F. Four step media blast and iron phosphate pretreatment for protection and paint adhesion. 400°F bake for maximum hardness and durability.
